### DESCRIPTION

JET-LUBE's Water-Based RUBBER LUBRICANT and MOLD RELEASE AGENT is a multi-purpose, environmentally safe silicone product that provides unsurpassed performance. Contains twice the silicone content of leading aerosols for increased protection.

When used as a RUBBER LUBRICANT, it makes assembly of plastic and rubber parts fast and easy. Whether squirted, sprayed, or brushed on, RUBBER LUBRICANT provides a temporary, wet, slippery surface, and then either dries to a thin protective film, or is absorbed into natural or synthetic rubber.

As a MOLD RELEASE AGENT, extra heavy silicone content provides maximum release capacity under even the most severe molding conditions. Excellent for all metal, plastic, and rubber castings. Heat stable to 500°F. Non-flammable. Will not melt or gum.
