

# SILVER PLUS REGULAR

## METALLIC ANTI-SEIZE

### DESCRIPTION

**JET-LUBE's SILVER PLUS REGULAR** metallic anti-seize is designed to provide a protective film against galling and seizure over a wide range of applications. The micro-sized particles produce a smooth creamy consistency that allows it to quickly and easily coat fine-threaded and small and large-diameter fasteners.

**SILVER PLUS REGULAR** utilizes a water resistant, high temperature complex base grease as its carrier giving it superior "stay put" qualities. The complex thickener and highly refined base fluids allow for brushability from -20°F (-29°C) to 450°F (232°C). The petroleum carrier, however, makes **SILVER PLUS REGULAR** unsuitable for oxygen service.

**SILVER PLUS REGULAR** contains micro-sized aluminum and copper as well as other nonmetallic extreme pressure and anti-wear particles. The metallic components make it very conductive and since the primary anti-seize particles is aluminum, it nearly eliminates the potential for galvanic corrosion. It also makes it the anti-seize of choice for components made of aluminum and its alloys.

- Shiny Silver Color
- Service Rating: -65°F (-129°C) to 1800°F (982°C)
- Resists galvanic corrosion
- Permits reuse of fittings
- Resists alkaline and acid vapors

### APPLICATIONS
